HPQ Secures First Conditional Purchase Reservation Agreement Valued at US$125,000 (C$180,000) For 100 Endura+ Minimax Power Systems

- *First conditional purchase reservation signed just days after the ENDURA+ MiniMax product unveiling*

MONTREAL, Canada, November 23, 2026 — HPQ Silicon Inc. ("HPQ" or the "Company") (TSX-V: HPQ, OTCQB: HPQFF, FRA: O08), a technology company specializing in advanced materials innovation and the development of next-generation processes, announces the signing of its first conditional purchase reservation agreement for 100 *HPQ ENDURA+ MiniMax* portable power systems, representing a potential purchase value of US$125,000 (approximately C$180,000).

The agreement comes just days after the November 17, 2026, unveiling of the ENDURA+ MiniMax, a 1.95 kWh portable power system powered by HPQ ENDURA+ Gen4 battery cells and designed to deliver extended off-grid power for the Starlink Mini [1] satellite internet terminal. Weighing approximately 12 kg, the rugged, weather-resistant system features a 100 W USB-C power delivery port and two additional USB-C connections, providing a portable energy solution for off-grid connectivity applications.

"Securing our first reservation agreement representing US$125,000 in potential sales within days of unveiling the MiniMax provides an early indication of market interest in the product," said Bernard Tourillon, President and CEO of HPQ Silicon. "*This reflects the objective of our ENDURA strategy: to transform our battery technology into commercial products and establish a pathway toward revenue generation.*"

The reservation remains conditional upon meeting agreed technical specifications and applicable certification requirements before becoming a firm purchase commitment.

HPQ continues to advance product certification and commercialization preparations, with initial deliveries targeted for late Q1 or early Q2 2027, subject to the completion of applicable certification requirements.

The *HPQ ENDURA+ MiniMax* is a third-party product designed to be compatible with the Starlink Mini terminal. This reference does not imply any affiliation with or endorsement by SpaceX.

About HPQ Silicon

HPQ Silicon Inc. is a Quebec-based TSX Venture Exchange industrial issuer (TSX-V: HPQ) focused on innovation in advanced materials and critical process development.

HPQ holds a strategic 36.8% equity interest in Novacium, its research, development and commercialization partner. Together, HPQ and Novacium are developing next-generation silicon-based anode materials (Gen3 and Gen4) for batteries, pursuing commercialization of ENDURA+ lithium-ion cells, and developing innovative technologies for clean hydrogen production and energy recovery from waste materials. HPQ holds the exclusive rights to commercialize these technologies in North America.

HPQ is also pursuing proprietary technologies to become a low-cost, zero-CO_2 producer of fumed silica with technical support from PyroGenesis Inc. Together, these initiatives position HPQ to capture growth opportunities in the energy storage, clean hydrogen, and advanced materials markets essential to achieving global net-zero goals.

About Novacium SAS

Novacium is a French deep-tech company based in Solaize, specializing in developing silicon-based anode materials for lithium-ion batteries using a proprietary process. The company also designs custom battery cells and packs for demanding applications, particularly in the defence, aerospace and portable energy sectors.

Cautionary Note Regarding Forward-Looking Information

This press release contains forward-looking statements. These statements rely on assumptions about technology performance, market demand, permits, financing, supply chains, and economic conditions but remain subject to significant risks, including delays, regulatory challenges, competition, pricing, financing availability, and macroeconomic uncertainties. Actual outcomes may differ materially from expectations. Detailed risk factors are outlined in HPQ's Annual Information Form available on SEDAR+. Forward-looking information is provided solely to outline management's future expectations and objectives.

A more detailed cautionary note regarding forward-looking information related to the HPQ Endura+

batteries project is available for download [here].
